

Mathematics

The school aims to give all children a thorough understanding of number work, shape, space and data handling. A strong emphasis is also placed on investigative and problem solving activities. The work is delivered through a balance of individual programmes, group work and whole class lessons. Our mathematics curriculum has the overall aim of meeting the individual needs of children of all abilities, as well as offering challenge and enjoyment.

Mathematics is applied where possible in all cross curricular work. There is a strong commitment to practical activities leading to mathematical understanding as well as in mental arithmetic as a basis for the children to be able to tackle more complex mathematical operations with confidence.
